PUBLIC LECTURE WITH TOPIC: „Of Mice And Men: Translational Psychiatry“

29 April (Wednesday) 2026, 17:30-18:30 h
MEDICAL UNIVERSITY OF VARNA, AUDITORIUM 1

PRESENTED BY:

ANNA Y. YOTOVA, MSc, PhD

UC Davis School of Medicine/MIND Institute (CA, USA)

Anna Y. Yotova, MSc, PhD is a postdoctoral interdisciplinary Neuroscientist at UC Davis School of Medicine/MIND Institute (CA, USA), with a background in Neurobiology and specialized in Translational Psychiatry. She has extensive experience in behavioral, molecular, and morphological investigations of animal models of neurodevelopmental, psychiatric, and rare genetic disorders. Her previous and ongoing studies intersect with targets along important neuronal pathways in the brain, as well as environmental and genetic risk factors of autism spectrum disorders, among others.

The lecture will be delivered in English.

**Open to students, PhD students, members of the academic community
and everyone interested in the topic.**

Financed by the European Union-NextGenerationEU, through the National Recovery and Resilience Plan of the Republic of Bulgaria, project № BG-RRP-2.004-0009 “Medical University – Varna: Enhancement of Translational Excellence Achievement in Medicine (MUVE-TEAM)”
