

Project: "Conservation of the Ethnobotanical Wealth of the Northern Black Sea"

Program: Fund "Culture" – Municipality Varna

Period of implementation: 2018

Aim of the project:

The aim of the project is to preserve the unique ethno-botanical species in Varna and the traditional methods of healing among the local population in order to convey the knowledge about the impact of the herbs on the health of the next generations.

Project event in the Museum of the History of Medicine (24.06.2018)
