Molecular biomarkers for personalized medicine

Head: Assoc. Prof. Bistra Galunska

Email: bistra.galunska@gmail.com

Research Interests:

- Molecular biomarkers to assess the effect of exogenous factors (nutrition, stress factors, physical load, environmental intoxications and pollutants, etc.) on human metabolism;
- Molecular biomarkers with prognostic, diagnostic and preventative role;
- Metabolic profiling, metabolomics and metabolomic analysis to identify new low molecular biomarkers proteomics, proteomic analysis.
