

Prof. Tom Kristensen

1988-1992: Leader of Centre for DNA sequencing at the Biotechnology Centre of Oslo
1992-2015: Professor at Department of Biochemistry/Department of Biosciences at the University of Oslo
2015 - : Professor emeritus at Department of Biosciences, University of Oslo

Research interests: Bacterial genomics, bacteriocins

About me:

Cand. real. in Biochemistry 1971, Dr. philos. 1984

I started out as a «normal» biochemist working with enzyme purification and characterization, but got caught up in the molecular biology revolution and spent some time at EMBL working with the development of a system for automated DNA sequencing. This got me interested in the use of bioinformatics to extract as much information as possible from gene and genome sequences.

I am the author of 67 per-reviewed scientific papers (H-index 22)
