

Project:

Infrastructure for sustainable development in the area of maritime research, related to Bulgaria's participation in the European Infrastructure EURO-ARGO" (MASRI)

Program: Infrastructure included in the National Research Infrastructure Map

Years of implementation: 2017 г. - 2023 г.

Goals of the project:

The purpose of the MASRI Project is to improve the coordination and to integrate the efforts of the existing marine research infrastructures in order to combine them into a single, communication-related system, allowing a comprehensive approach to marine research and inclusion into European marine infrastructure networks and projects.
