

HORIZON 2020

Project: European Researchers' Night (NIGHT) "Researchers in the Knowledge Triangle" (K-TRIO 2)

Programme: Horizon 2020 Marie Skłodowska-Curie Actions - European Commission

Implementation period: 2014 - 2015

Project objectives:

- To improve the public's perception of scientists by enabling all participants to discover the "human face" of science, and to learn about the contribution of science to improving lives;
- To show the hidden side of the life and work of scientists;
- To increase public understanding of the contribution of scientists to society and especially to improving people's lives and well-being;
- To point out the opportunities for scientists in the EU-wide labour market, and the EU's support for their careers and for the science;
- To demonstrate the importance of international and Europe-wide cooperation in the field of science and innovation.

European Researchers' Night 2015
